OUR COMPETENCE

Mad Devs has a wide range of experience from idea development to final product launch and maintenance. We offer effective practices for every kind of development:

- Accurate definition of goals and the best means of achieving them.
- Transparent and productive formation and management of the project plan and team.
- Design, frontend, backend, and integrations for web services of any scale.
- Native mobile and desktop applications, the internet of things, and embedded development of any complexity.
- Infrastructure for testing, deployment, and administration of service updates.

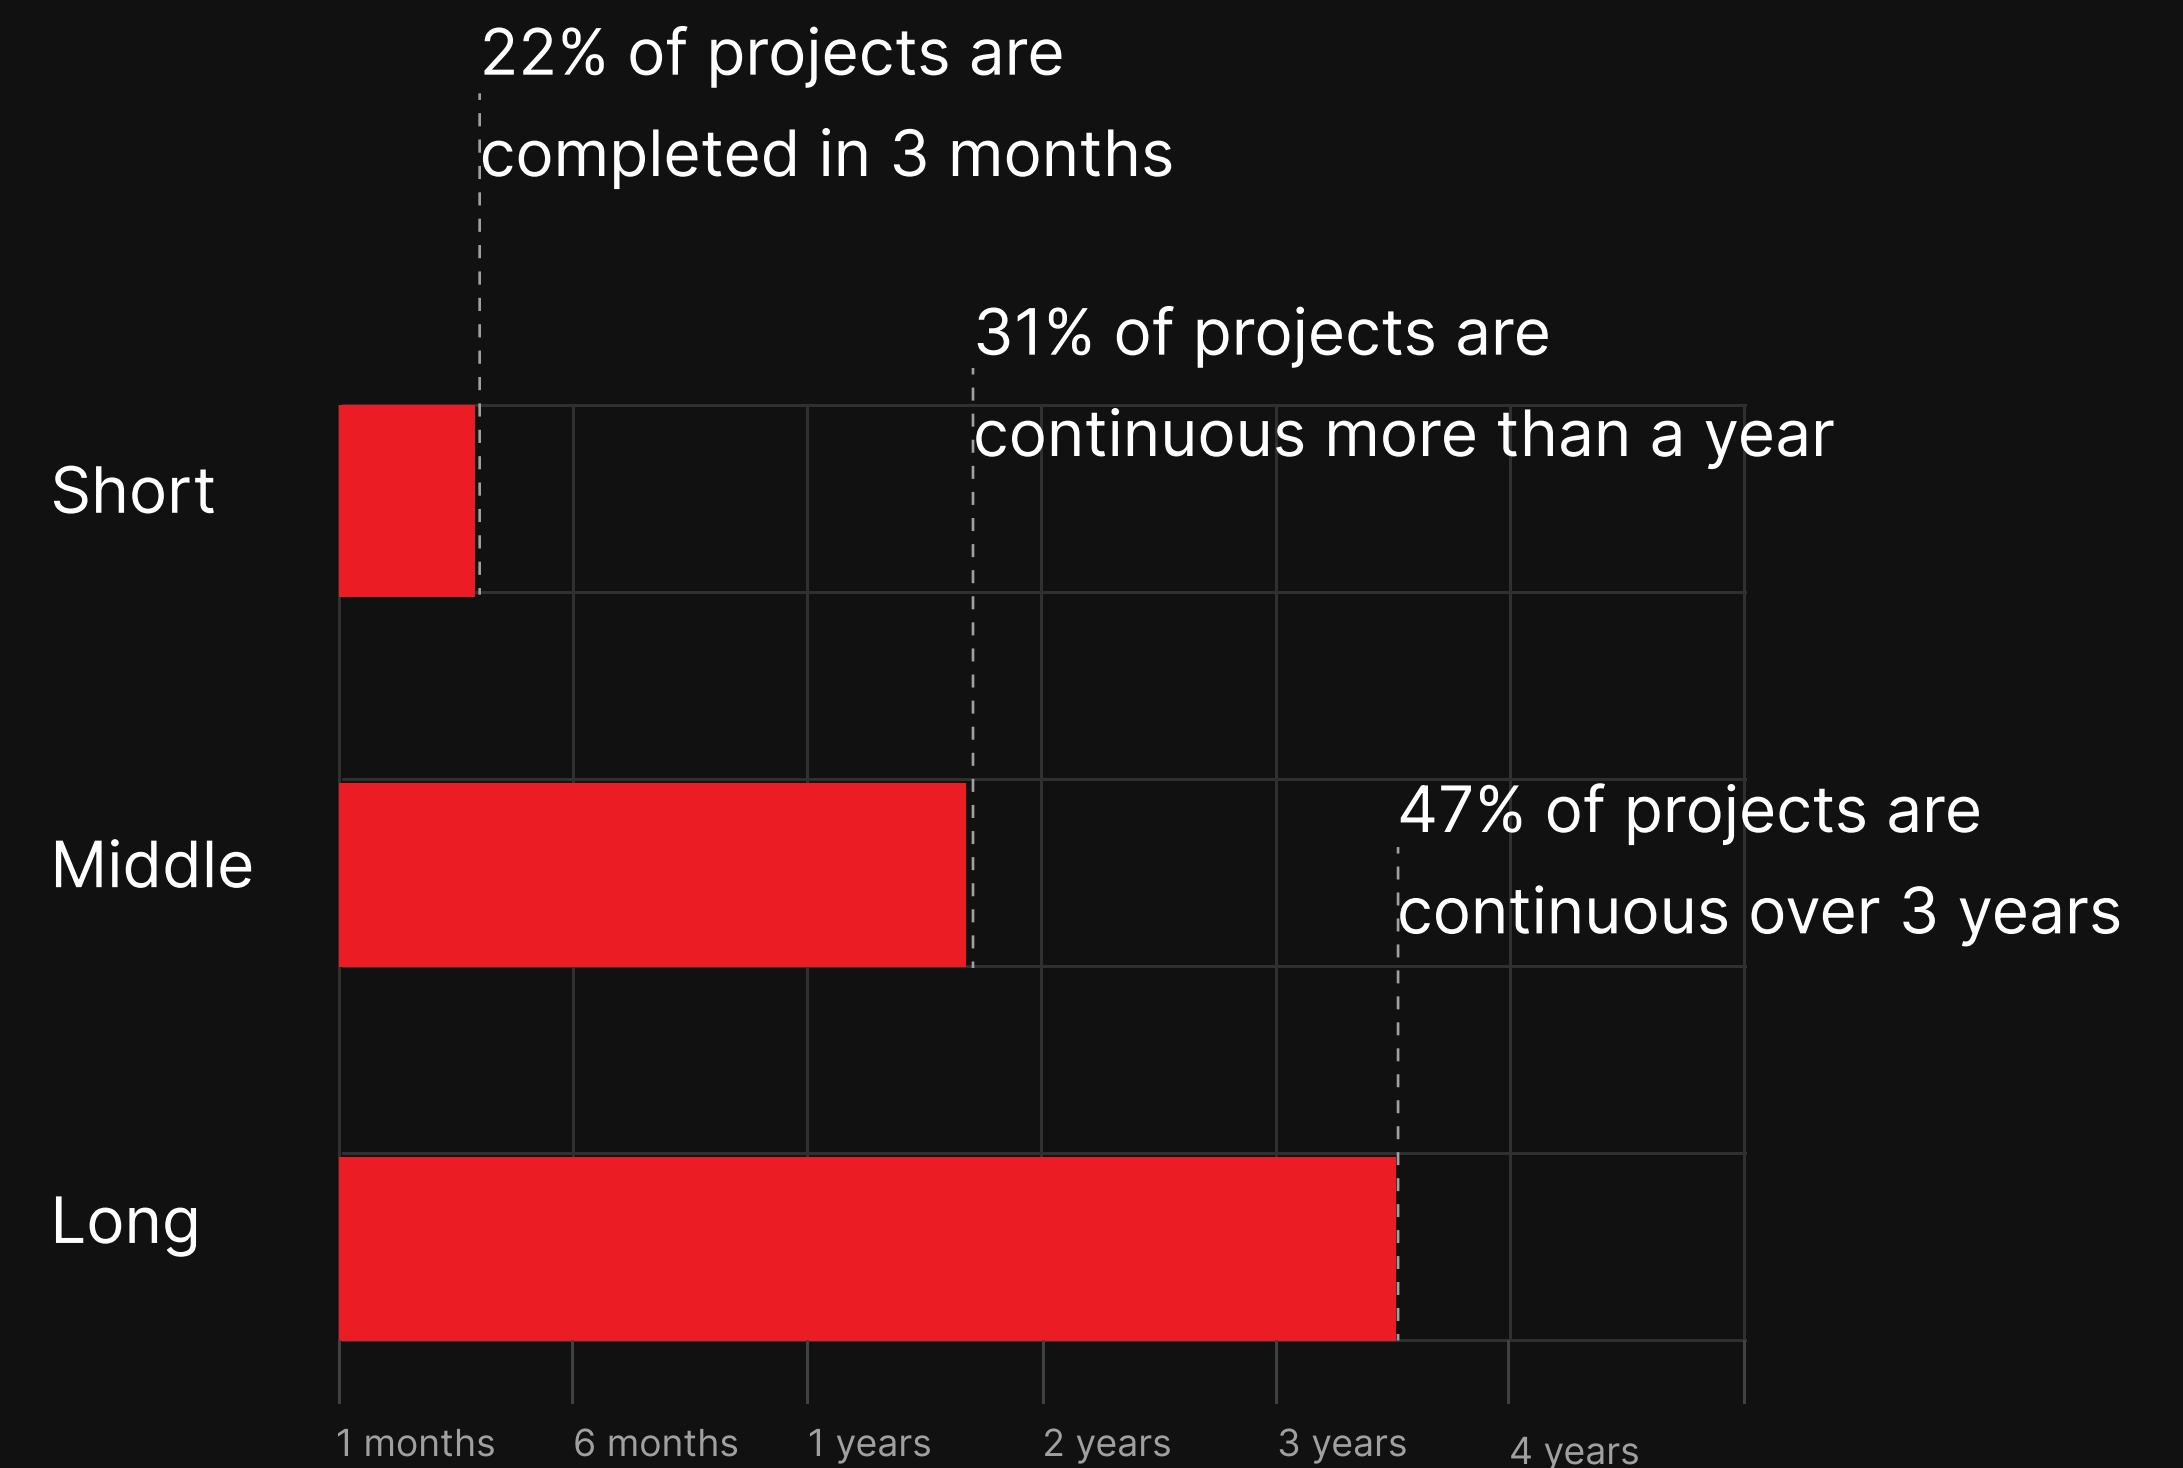

COOPERATION MODELS

Our collaboration models are based on transparent communication, equal risk-sharing, partnership, and involve

- Expanding the current team;
- Forming a project dedicated team;
- Temporary hiring of a specialist with further employment;
- Technical expertise and advising;
- Assignment of a mentor for an existing team;
- Full project transition.

ENGINEERING YOUR GROWTH

Although we can take on projects of any size, we prefer to work with medium and large projects with high lifetime value.

In partnership with clients, we adhere to principles of honesty, respect, and trust. This allows us to get positive feedback and continue our cooperation over and over for many years.

Being a small team without a project manager we have never regretted of the collaboration with Mad Devs. The team shared the product ownership and responsibility for its development.

TRANSPARENCY, FLEXIBILITY, CONTROL

Mad Devs is a large company with many distributed teams, which follow the principles of asynchronous communication and transparent workflow. More than 10 years of project management experience inspired us to develop Enji.ai - a proprietary soft to support these principles. It collects reports on Slack work logs, commits, standups, alerts, and analytics. With its help, Enji.ai provides transparency to our clients and allows us to work efficiently.

Our customers can verify the performance and usability of this tool in practice. Not only do we use Enji.ai in all our projects, we provide it to clients for free.

OUR TEAM

Mad Devs is a tight-knit group of specialists sharing common goals and values. High talent density in our 20+ teams creates a culture of collaborative innovation and autonomous people thrive.

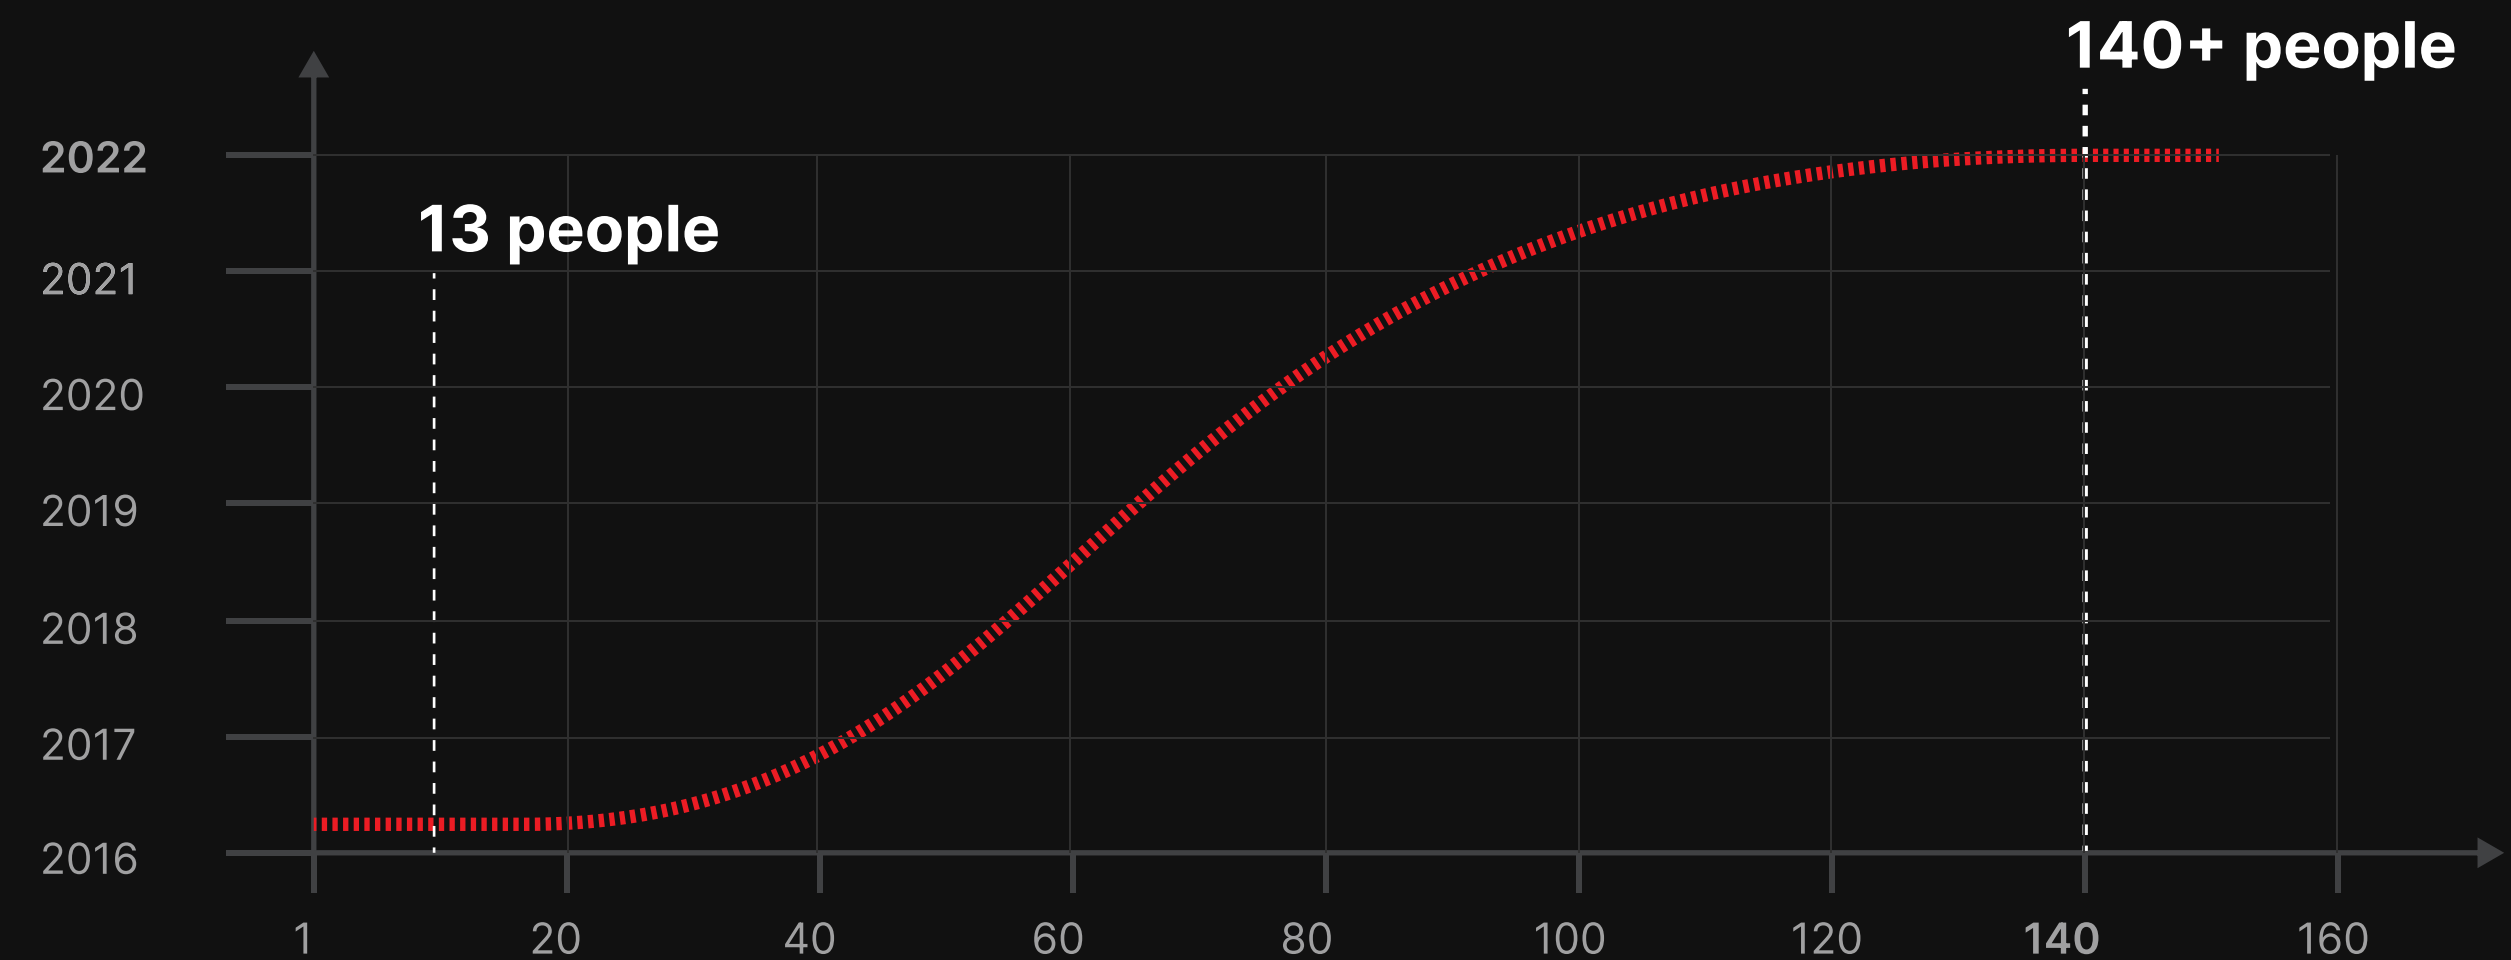

TEAM GROWTH

The main value in Mad Devs is the people who work together to achieve common goals. We are united by hard work, creativity, and responsibility.

We are invited to speak at conferences, Influencers distribute our articles, and major universities trust their students with us.

We support the growth of our employees and provide them with all kinds of resources to learn new skills, knowledge, and opportunities to prove them.
