WORK PROCESS AT MAD DEVS
OUR WORKFLOW

- Requirements collection and project evaluation
- Building a project scope
- Sprint planning
- Working closely with the customer
- Acceptance of deliverables
- Monthly report & invoice for payment

This is Alex. He is our customer. Alex is ready to be involved in our process for the success of his project.
Requirements collection and project evaluation

- Collection of project requirements
- Project Evaluation
- Assigning the project to a team
Getting familiar with the project

Transparency of interactions is our priority.

We introduce you to the whole team and explain who is responsible for what.

You get access to all channels for better communication with the team.

Working closely with the customer

You will be able to see what the team is working on and track project progress.
PROJECT WORK PLAN: DAY, WEEK, MONTH

We hammer out details of your requirements.

We get the scope of work approved by you.

We create the project roadmap with a tentative deadline for each stage.
We have sprint planning.

We write daily standups.

We deliver sprint results to staging or production environments.
PROJECT MANAGEMENT TOOLS

We use JIRA and Slack to provide reports.
TOOLS WE USE TO AUTOMATE OUR WORK:

- **GitLab** for CI and Version Control
- **Confluence** for documentation
- **Comedian** for daily standups
**AGILE / SCRUM OR KANBAN**

All projects are implemented using the Scrum or Kanban methodologies, according to the current stage of the project.

According to the roadmap, we divide the development process into weekly or biweekly sprints and set goals to track progress on the project.
The practice of continuous delivery / integration (CD / CI) allows you to frequently implement small fixes and new features instead of having complex releases. This reduces risks and speeds up project work.

We practice the DevOps approach by controlling the quality of the code and its delivery.
METHODOLOGY AND APPROACHES

TEST DRIVEN DEVELOPMENT

The maximum test coverage ensures the correct code execution and helps the project develop faster in the future, when the logic of its work becomes more complicated.
WORK ACCEPTANCE IN THE END OF THE MONTH

We deliver reports according to your requirements.

We provide a monthly report showing how many hours each of our specialists worked on your project.

We invoice you based on the report submitted.

The ownership of the code repository belongs to you unlimited after payment for work. You also have access to all project documentation.
DEVELOPMENT OF THE PROJECT

We help retain your loyal customers and grow customer base as we constantly improve your product and service.
